Explore AY Solutions

Data-driven Publishers and SSPs are maximizing revenue by using a single platform to collect, analyze, and optimize their operations.

Publishers

Supply Side Platforms

Data is Power for World Leading SSPs

Publishers can expect better results by working with many Supply Side Platforms simultaneously and opening up new avenues of demand. AY gives the tools to SSPs to make these workflows extraordinary.

What are the issues we are solving with SSPs?

Supply Side Platforms often face greater competition for demand in the industry, duplication of auctions with very high infrastructure cost.

Introducing AY's unique QPS optimization solution

Double or Triple your results by understanding the demand behind each user

The traffic shaping decisioning is based on a frequently trained machine learning ensemble combining the strengths from Gradient Boosting and Neural Nets as seen in most of the top kaggle.com submissions.

The AI performance is enforced with the creation of user profiles in real time, which greatly improves the accuracy of the predictions further. This is done in a very resource-efficient way.
