[Krone](#), Austria's largest independent news site and a leader in fast news publishing, is renowned for delivering timely and reliable news to millions of readers. As a cornerstone of Austria's media landscape, [Krone](#) prides itself on staying at the forefront of technological advancements to meet the ever-evolving demands of the digital publishing world.

However, when their previous ad configuration processes began to feel limiting, Krone sought a solution to empower their team and unlock new opportunities. After partnering with [Assertive Yield](#) to implement our full suite of [Yield Manager](#), [Yield Intelligence](#), [AY Prebid Server](#), and [Dynamic Flooring](#), they streamline operations, enhance testing capabilities, and boost pageview RPM.

"What we found quite a challenge was to be able to deploy and adapt our ad config as fast as we wanted to. In the past, we utilized home-built ad config on top of a well-known wrapper, which was all right for some time, but we saw that there was a need for a change to basically up the pace and have better outcomes," Tobias Hauschild, Head of Ad Technology at Krone

The Challenges: The Need for More Flexibility and Efficiency

[Krone's](#) growth and ambition to stay ahead in a competitive market presented specific challenges with their existing ad configuration setup. Their home-built solution, layered on top of a popular wrapper in the market, worked adequately for a time.

However, the rigidity of the setup restricted their ability to experiment and adapt quickly. Testing new configurations was cumbersome and infrequent, often limited to once a month. This slow pace hindered their ability to respond effectively to market demands and explore opportunities for revenue optimization.

Furthermore, Dynamic flooring was a key part of their strategy, but its lack of integration with AdManager's Unified Pricing Rules limited Krone's ability to fully optimize results.

Recognizing the need for a more agile, efficient, and cost-effective solution, [Krone](#) turned to [Assertive Yield](#) to bridge these gaps.

The Solutions - Utilizing AY Next-Gen Publishers Platform

Krone now streamlines operations, enhances testing capabilities, and boosts revenue, by leveraging the [AY Next-Gen Publishers Platform](#);

- 1. Advanced Testing Capability:** Now with a more advanced testing capability, Yield Manager provides, Krone can experiment, deploy, and revert changes quickly, often running one to two tests weekly. This was a significant leap from their previous rate of one test per month.
- 2. Real-Time Data Insights:** Krone can now monitor the impact of changes within minutes rather than waiting for extended periods with Yield Intelligence's [real-time reporting](#) capabilities that provide immediate visibility into test outcomes, enabling swift decision-making.

3. **More Control and Flexibility:** Krone now has the flexibility to adapt their ad configuration effortlessly. From making quick adjustments to exploring new setups, Assertive Yield's platform simplifies complex processes, saving valuable time and resources.

The Results; Faster and Accurate Testing, Efficiency, and Revenue Growth

"Since implementing AY and having those changes, I'd say we're able to up the programmatic page view RPM by around 12 to 15 percent. This means the session RPM will also be a chunk higher than it has been before. And the main KPI that matters for us at Krone is that we've been able to deploy almost 360 different versions of Assertive Yield's wrapper solution or config solution"

1. Deployed 360 Versions of Assertive Yield's Wrapper Solution:

Krone has successfully deployed nearly 360 different versions of Assertive Yield's configuration solutions for continuous improvement. Their focus remained on refining configurations, optimizing partnerships, and maximizing views. Each new version, each adjustment, was a step forward in their pursuit of efficiency. Testing, and analyzing results were at the heart of their strategy—determining what worked, and what didn't for them to stay ahead.

2. 12 - 15%+ Pageview RPM Uplift:

According to Tobias, Krone had previously used a Prebid wrapper, managing multiple changes at once. But since implementing Assertive Yield's solutions, they had seen a significant impact—programmatic page view RPM had increased by 12 to 15%, driving session RPM even higher.

3. Faster A/B/n Testing:

Krone values the speed and flexibility Assertive Yield provided. The ability to make quick changes, run A/B/n tests, and see results within minutes was a game-changer. They can quickly create, test, deploy, and adjust as needed, enabling seamless ad operation, optimization, agility, and control.

4. Streamlined Operations:

Krone now has the ability to test new technologies and solutions quickly, reducing opportunity costs and optimizing resource allocation. This shift has encouraged Krone to engage more with new partners and technologies, enhancing their competitive edge.

5. Exceptional Support:

"The customer solutions team of Assertive Yield is just great, and I love the communication via Slack channel where you can get answers to your questions and insights very fast." Tobias Hauschild - Head of Ad Technology at Krone.

Conclusion

[Krone](#) has cemented its position as a leader in Austria's competitive web publishing market through its commitment to innovation and continuous improvement.

By embracing advanced tools and streamlined workflows, [Krone](#) has unlocked new levels of operational efficiency, enabling them to adapt swiftly and achieve remarkable revenue growth. Their forward-thinking approach and dedication to excellence ensure they remain at the forefront of the industry.

Assertive Yield is proud to continue supporting Krone in their journey, providing ongoing solutions that help it stay ahead of the curve and achieve even greater success.

As Tobias Hauschild puts it, *"Assertive Yield is a premium solution offering great capabilities. If you want to be at the forefront of ad configuration and programmatic monetization, Assertive Yield is the way to go."*
