How we change the game

The old game metrics are viewability, exposure, user sessions, and page views. Now you can access massive, granular data and unlimited metrics across more than 100 dimensions.

Old Game	New Game
 Floors manually update in each country, device, partner, and only GAM	 Holistic fully automated revenue optimization by AY Machine Learning (Prebid + GAM + Amazon)
 Lack of data granularity on floors, one fits all	 Set smart floors in real-time: on impression level with user's CPM information
 No flooring at all or updates	 Dynamically adjusts to market value – takes visit depth/time into account

Traffic Shaping for Publishers

Optimize bid requests filtering out: no-value bid requests, browsers, low-viewability, ad units, and sizes. Increase your win rates with each SSP proving to be a valuable partner for them. Enhance your user experience while improving the SPO.

AI Dynamic Flooring

Built for first-price auctions to support all major platforms, providing transparency and outstanding results to DSPs, which is impossible with GAM and UPRs. Protect your inventory against low-quality ads, high operational expenses, and falling CPMs
