AY Latest Product Updates

New Solutions 🚀

- **AY Prebid Server:** Optimize your ad bids with our faster, smarter prebid server.
- **Traffic Shaping for Publishers:** Control your audience's journey and direct traffic where you want it.

New Features 🔧

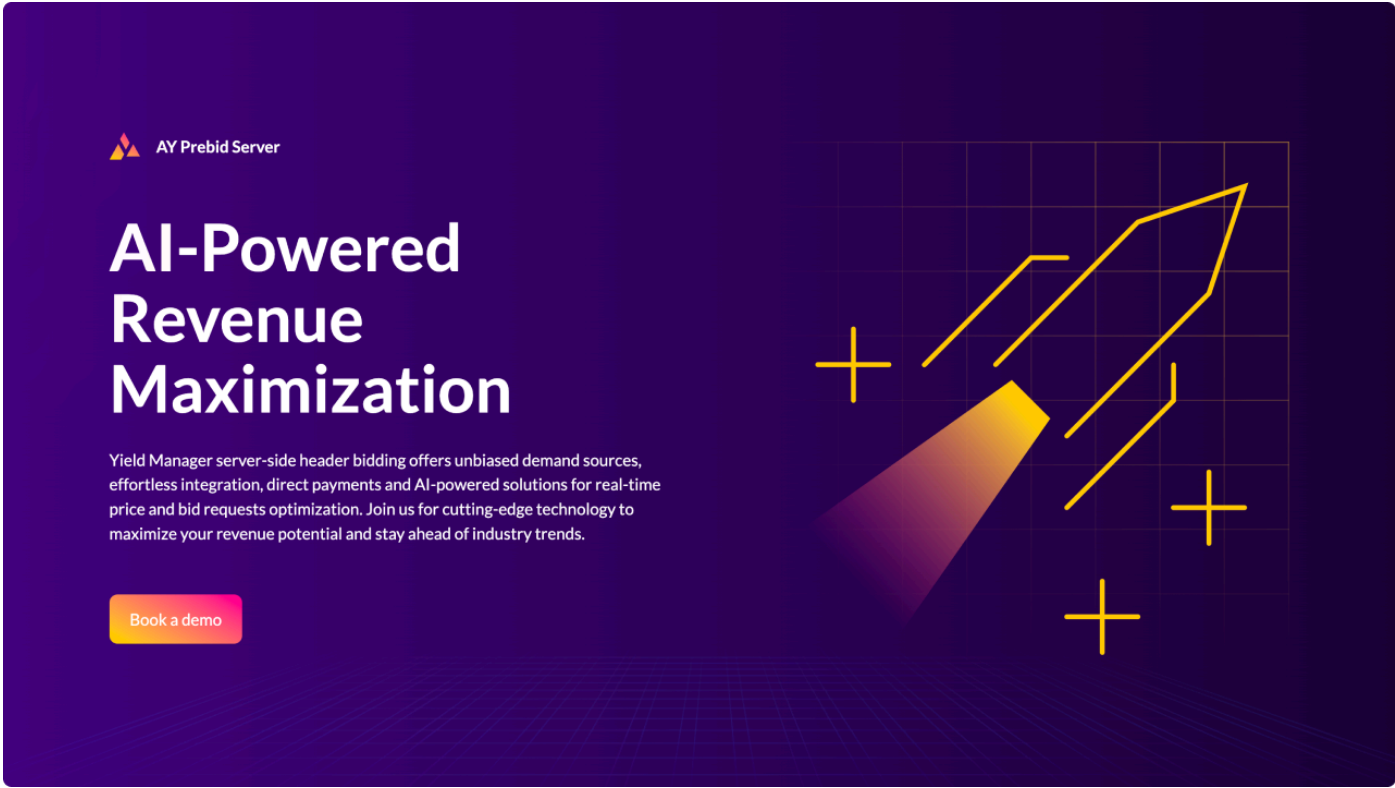

- **Yield Manager v3:** Now with Bid Prefetching & Refresh Control, giving your ad revenue a super boost.
- **Scheduled Emails Report:** Stay updated with scheduled reports delivered right to your inbox.
- **Additional SSPs Connections:** More connections, more revenue opportunities. Check them out!

New Reports 📊

- **360° Panorama Report:** Comprehensive insights in one place.
- **Cookie Depreciation & API Topics Dimensions:** Stay ahead in the cookie-less future.
- **AI Reports:** Smart, intuitive insights powered by AI.

- **INP Metric & AY CWV Dashboard Template Updated:** Enhanced metrics for deeper insights.
- **Web Analytics:** New Web Performance Metrics and Facebook S2S conversions to upgrade your analytics game

New Solutions

AY Prebid Server

AI-Powered Revenue Maximization

Yield Manager server-side header bidding offers unbiased demand sources, effortless integration, direct payments and AI-powered solutions for real-time price and bid requests optimization. Join us for cutting-edge technology to maximize your revenue potential and stay ahead of industry trends.

[Book a demo](#)

The banner features a dark purple background with a subtle grid pattern. On the right side, there is a stylized line graph with a yellow-to-orange gradient, showing an upward trend. Several yellow plus signs are scattered around the graph, suggesting growth or positive metrics.

AY Prebid Server - AI-powered, Unbiased, and Flexible

Elevate Your Server-Side Prebid with Agnostic Demand, Traffic Optimization, and Automated Floor Pricing. Test and Celebrate Success!

AY Yield Manager is a powerful hybrid wrapper solution that allows publishers full transparency, flexibility, and control. Now, it also provides unparalleled flexibility for client-side, server-side, or both configurations.

Recognizing the diverse needs of publishers, we've launched an additional solution for those who wish to maintain their existing wrappers while still leveraging the power of an AI-powered Prebid Server.

AY Prebid Server Unique Features:

- **AI Traffic Shaping**

Maximize ad fill rates and CPMs, reduce SSP throttling, lower carbon emissions, improve SSP relationships, and enhance revenue by up to 10% with AY's real-time user profiling and efficient demand paths.

- **AI Dynamic Flooring**

Optimize first-price auctions across platforms with transparency and superior results, unrivaled by GAM and UPRs. Shield inventory from low-quality ads, operational inefficiencies, and declining CPMs.

- **Identity Solutions Integration**

Maximize performance on cookieless traffic with integrated Identity solutions, delivering over 15% uplift on iOS CPMs. Expect similar benefits on Chrome, supplemented by the Topics API. Embrace cookie-free innovations.

- **Higher CPMs & Revenue**

Boost CPMs & Revenue with AY's granular data and AI floor prices per auction. Bid in real-time from multiple partners to boost auction pressure and maximize your revenue potential.

Key Benefits of the AY Prebid Server

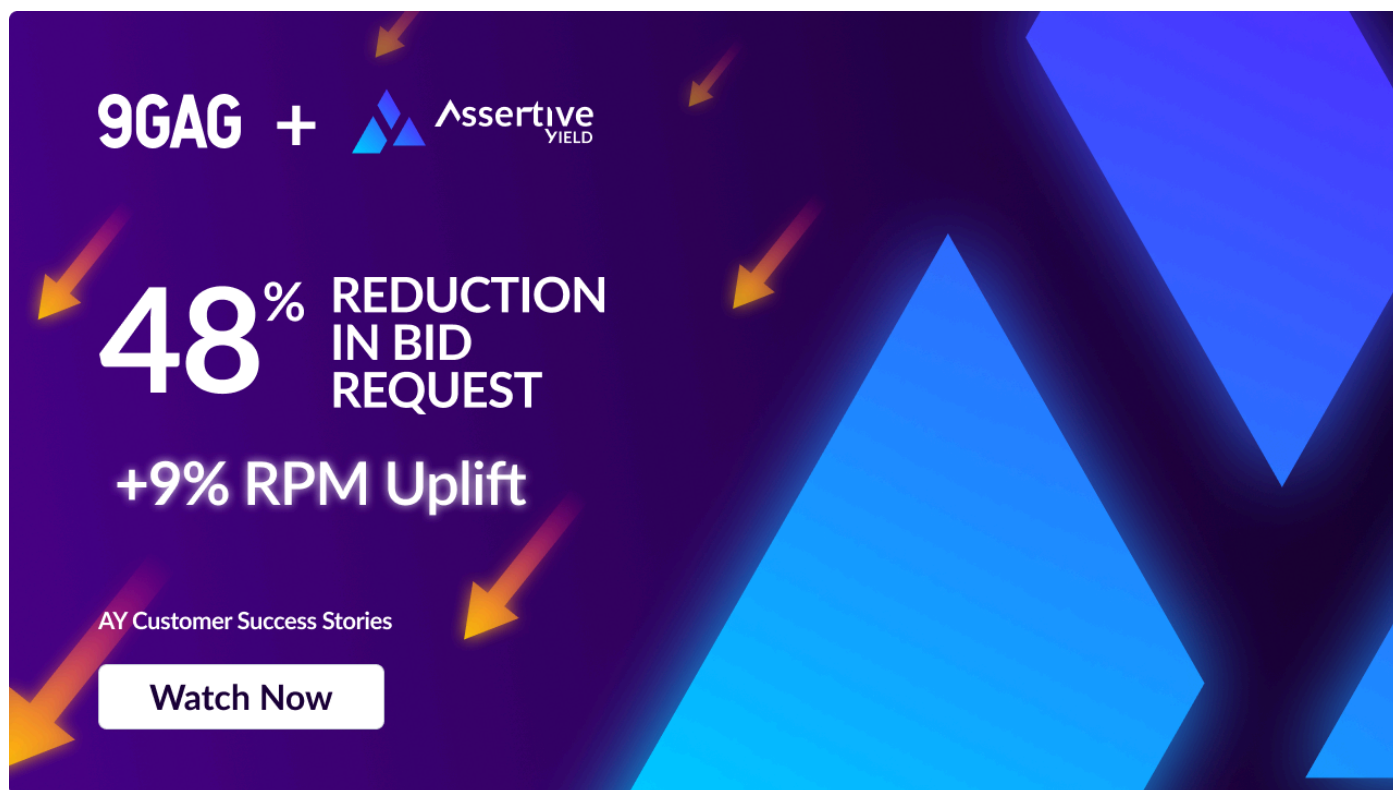

✓ **Unbiased Demand:** Assertive Yield ensures a fair and unbiased auction environment by refraining from influencing demand through backroom deals or demand referrals. Allowing you to choose partners freely and add any or all bidders for maximum revenue impact.

✓ **Seamless Integration:** Efficiently integrate our streamlined script for quick deployment, minimizing technical hurdles. Effortlessly integrate cutting-edge technology to optimize efficiency and drive success.

✓ **AI Revenue Maximization:** Be empowered by the most advanced solutions powered by artificial intelligence and machine learning to optimize price floors in real-time; shape your traffic efficiently; maximize your revenue; and enhance your user lifetime value.

✓ AY's Global Support | Unlock New Opportunities: Expertise, guidance, prompt replies. Join us and let's co-create new features and break industry paradigms together!

New Features 

Yield Manager v3.0

Bid Prefetching

We're thrilled to introduce Yield Manager's new version (v3), designed to elevate your ad management capabilities. This latest release brings a host of enhancements, including:

1. Bid Prefetching and Performance Improvements:

- Introducing bid prefetching to streamline ad render time and boost viewability.
- Splitting up the ad unit auction and ad server request process into "Fetch" and "Render" stages for optimized performance.

2. User Experience Enhancements:

- Improved split test page UX for smoother navigation and analysis.
- Enhanced ad unit path input for easier editing and variable usage.
- Fullscreen code editor accessibility with a simple double-click.
- Workspace and Configuration Enhancements:
 - "Import Workspace" option on the versions page for duplicating workspaces.
 - Added configuration page for the analytics tracker with optimized loading.
 - Configuration editor for APS/Amazon for greater customization.

3. API and Integration Improvements:

- New fetch + render API methods for enhanced functionality.
- Pre-fetch mode option in the refresh API method for immediate and automatic fetching of the next auction.

4. Other Notable Changes:

- UI filters for all table columns for improved data management.
- Bidder CPM adjustment and storage option on the bidder page for greater control.
- Expiration selection for preview links for enhanced security.
- Our latest release turbocharges UI performance, enabling massive setups with dozens to hundreds of domains under one workspace.

Add new Refresh Control

Order	Enabled	Type	Value	Seconds
1	☒	SIZE	300x50	60
2	☒	ADVERTISER	Amazon	65
3	☒	BIDDER	teads	70

Create **Cancel**

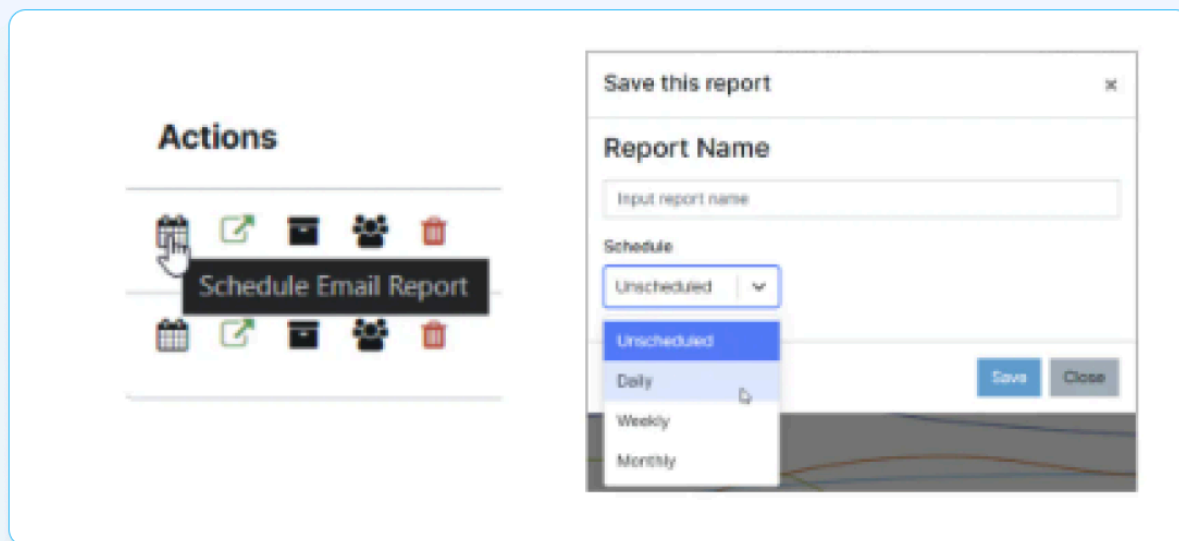

Refresh Control

Additionally, we're excited to unveil the beta release of Yield Manager - Advanced Refresh Controls, allowing even more granular configuration and comprehensive ad unit refresh rule customization for enhanced performance optimization.

The new Refresh Controls are now available in the Beta branch, providing full control of the refresh interval with configurable refresh rules based on the winning impression. This includes Prebid bidder, creative size, and GAM types like order. Refresh control groups can be assigned to one or multiple ad units, while still providing the option to set a simple static refresh interval.

Create in-depth ad unit refresh rules with the latest Yield Manager update.

[Talk to our Experts!](#)

Scheduled Emails Report

We're thrilled to announce the early access launch of Scheduled E-mails Reports.

Now, you can effortlessly configure and save reports within the Report Manager, ensuring timely delivery straight to your inbox. Don't miss out on this opportunity to streamline your reporting process.

Key Benefits of the Email Report:

- ✓ Convenient setup within the Report Manager
- ✓ Seamlessly save configured reports
- ✓ Enjoy timely delivery to your and your team's email inbox

Revolutionize how you manage your reports!

This website uses cookies. [Learn more](#)

Additional SSPs Connections

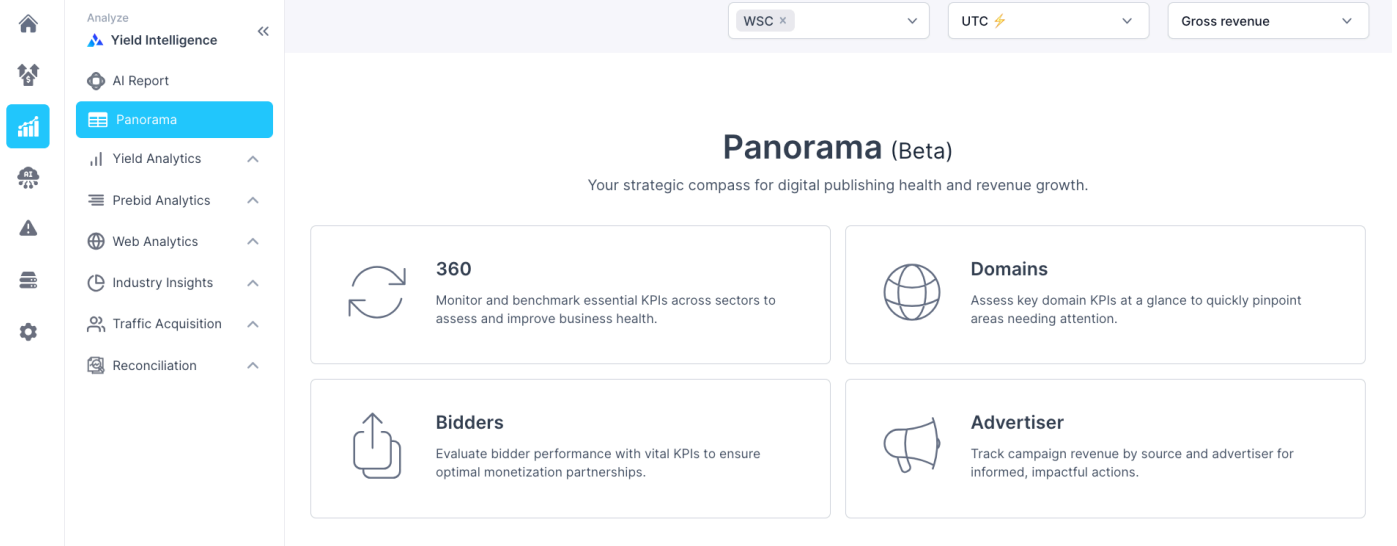

New SSP Connections Ready for Your End-of-Month Reconciliations!

We've updated our SSP Connections (API) to include various SSPs such as Xandr/AppNexus, TripleLift, Magnite/Rubicon, and many more. Connect your SSPs to the AY platform to automatically manage bid adjustments based on discrepancies between bid and payment amounts. Set alerts for relevant discrepancies to enable immediate action.

This feature allows your team to monitor and compare real-time data discrepancies in SSP revenue, saving time and effort in building connections and comparing with GAM data. You can also set alerts for significant discrepancies and create a dashboard to share with your partner SSPs, so they can explore the issue further without constantly asking you for more data.

Set up your [SSP Connections \(API\)](#) or [reach out to us!](#)

New Reports 

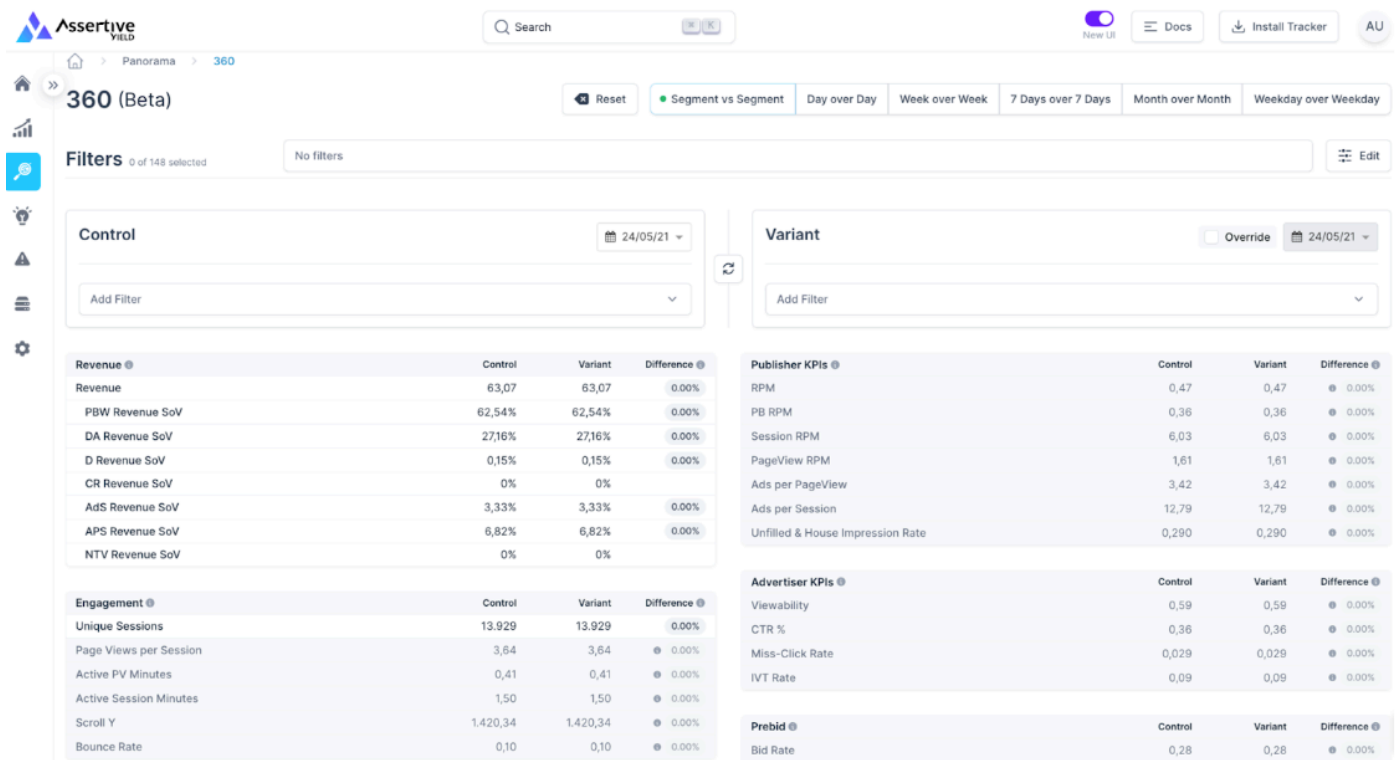

360° Panorama Report

Panorama (Beta): Enjoy an all-in-one control panel with your KPIs

An exciting new feature is the Panorama, and 360 is the first report available for you.

360 is a powerful report for comprehensive business optimization. An all-in-one control panel consolidating crucial KPIs for a holistic view, strategy, and revenue growth. Unifying pivotal metrics on a single page, this feature empowers you to dive into your key performance indicators, such as:

- **Revenue by Source:** Pre-Bid Revenue (PBW), Dynamic Allocation or AdX + AdSense (DA), Direct Sales (D), Content Recommendation (CR), AdSense (AdS), Amazon (APS), or Nativio (NTV)
- **Engagement metrics:** Unique Sessions, Page Views per Session, Scroll Depth, Bounce Rates, and more;
- **Publishers KPIs:** Session RPM (revenue per thousand impressions), PageView RPM, Ads per Pageview, Ads per Session, and more;
- **Advertiser KPIs:** Viewability, CTR, Miss-Click rate, IVT rate;
- **Prebid KPIs:** Bid Rate, Timeout Rate, Bid CPM, Win CPM, Request per Auction, Request Rate, Request Win RPM, and more.
- **Core Web Vitals:** CLS, FID, LCP performance.

Your team now has an overview dashboard to compare main Prebid, CWV, and Publisher KPIs performance on a weekly, daily, or monthly basis. You can also segment A/B testing and traffic segmentation analysis by custom user segments (such as new or returning visitors), or by different traffic sources.

Key Benefits of the 360 Panorama Report:

- Easily monitor and benchmark essential KPIs across sectors to boost overall business health.
- Evaluate bid performance with the most relevant KPIs, guaranteeing optimal monetization partnerships.
- Swiftly assess domain-specific KPIs for immediate identification of areas needing attention.
- Track campaign revenue by source and advertiser for informed decision-making.

Empowered by a 360 Panoramic view, you and your team will further enhance your ability to elevate your strategic approach, ensuring not just growth but strategic success.

AI Reports: Create Granular Reports in Seconds!

We are thrilled to introduce you to the latest upgrade in our tool: the AI Report, powered by ChatGPT. Designed specifically for publishers, this innovative feature revolutionizes the way publishers generate and analyze various reports.

You don't have to manually create reports from scratch! Just enter a prompt and our AI automatically generates the report in seconds!

The AI Report leverages advanced AI capabilities available within AY Yield Intelligence to streamline the creation of publishers' reports. By integrating seamlessly with ChatGPT, it saves user prompts and offers a comprehensive history feature, ensuring a personalized and efficient user experience.

The AI Report Features:

- **Advanced AI Capabilities:** Integrated with ChatGPT, the AI report intelligently interprets queries and generates insightful reports.
- **Prompt Saving:** Users can save prompts for quick retrieval and reuse in future interactions.
- **History Feature:** Access a detailed history of interactions, facilitating easier tracking and analysis.

Key Benefits of the AI Report:

✓ Generate customer reports faster and easier than ever before.

✓ Quickly analyze large volumes of data to extract valuable insights.

✓ Automate repetitive tasks, freeing up your data science team's workload to focus on higher-value activities.

✓ Reduces the complexity and time required for report generation, anyone can create a report!

✓ Tailor reports based on specific user queries and historical data.

✓ Minimize human error in report generation, ensuring more reliable and precise results.

Now you can seamlessly create detailed reports in seconds within Yield Intelligence, ensuring that you don't have to manually create reports by entering so many details, with a prompt, you can now build your idea reports without breaking a sweat! Don't miss out on this opportunity to streamline your report-generation process.

Revolutionize how you create your reports!

New Look & Feel: Navigation UI

Exciting news!

We are excited to announce the launch of our latest Navigation Design, now available with just a click!

The revamped interface promises enhanced user experience and streamlined navigation, making it easier than ever to explore our platform. We value your input and would greatly appreciate your thoughts on the new design. Your feedback will help us fine-tune the interface before its final release.

Experience the new Navigation Design firsthand and [share your valuable feedback with us](#). Thank you for being a part of our journey towards innovation and excellence.

New Metrics

INP Metric & AY CWV Dashboard Template Updated

To help you monitor, enhance, and leverage the new INP metric, we have already included it in our platform metrics. You can also use AY's CWV / INP Dashboard Template and INP real-time Alert template for you to keep track of that.

These resources are designed to seamlessly integrate into your existing workflow, providing you with actionable insights right when you need them.

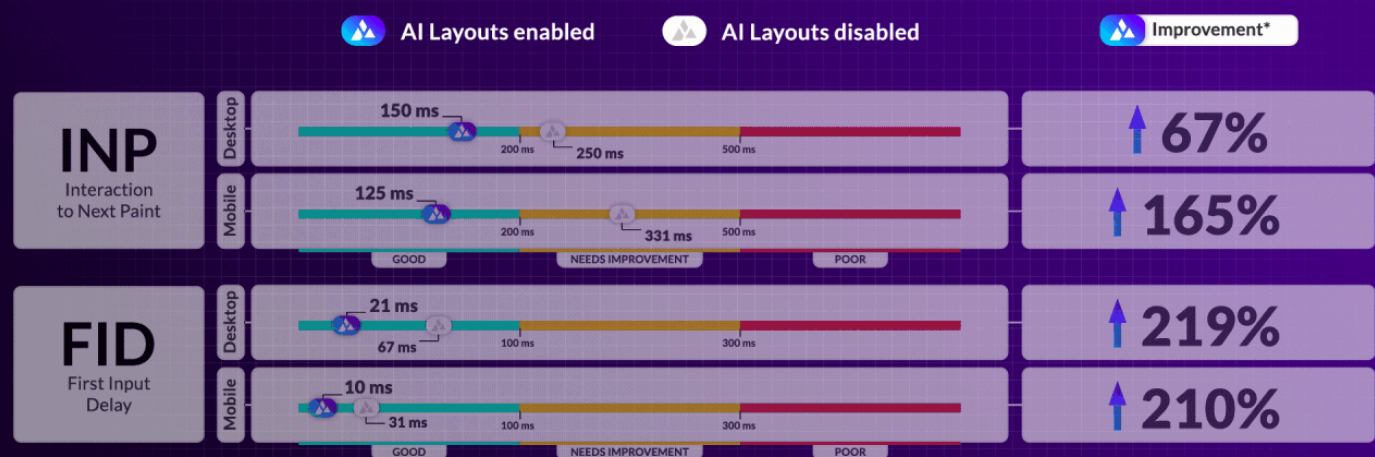

How to Access?

INP Dashboard Template: Simply navigate to "Dashboard" on the right side menu, and on the right side, you will find all "AY Dashboards" templates. Select the "Core Web Vitals" option and "open". You'll find a pre-configured layout featuring all CWV, including the INP Metric, along with complementary visualizations to provide context and depth to your analysis. Create a copy of the template and customize it as you wish.

Real-time Alert: Stay ahead of the curve with our alert system. Set custom thresholds based on the INP Metric and receive notifications directly to your preferred communication channels, ensuring you

Discover how to Improve INP Performance.

Core Web Vitals Performance Among AY's Partners:

This data was pulled on 2024-03-25. We extracted this data considering each host (domain) and the media value between them for each metric: smartphone and desktop.

How can AI Layouts positively impact your Core Vitals?

Partners utilizing AI Layouts are experiencing significant improvements in several key Core Web Vitals metrics, particularly in First Input Delay (FID) and Largest Contentful Paint (LCP).

This suggests that AI Layouts are effectively optimizing the loading speed and responsiveness of the websites, leading to better user experiences in terms of initial interaction and content rendering.

While Cumulative Layout Shift (CLS) also shows some improvement with AI Layouts, the most notable enhancement appears to be in Interaction Responsiveness (INP). This indicates that the implementation of AI Layouts is positively impacting how quickly the websites respond to user input, further enhancing the overall user experience.

Overall, these results highlight the effectiveness of AI Layouts in improving Core Web Vitals metrics and underscore the importance of utilizing advanced techniques and technologies to optimize website performance and user experience.

Haven't you activated your AI Layouts feature yet?

Web Analytics: 10 New Web Performance Metrics & GAM Automatic Mode

Web Analytics: 10 New Web Performance Metrics

Our newest addition to your toolkit for optimizing your online presence.

With these metrics, you can delve deeper into webpage loading and interaction, empowering you to enhance user experiences like never before.

Let's take a glance at the key metrics:

1. **Avg. Network Time:** Learn how efficiently your network connections are established.
2. **Avg. Transfer Time:** Understand the efficiency of data transfer from server to browser.
3. **Avg. DOM Completion Time:** Gauge how quickly your webpage becomes interactive.
4. **Avg. Page Load Time:** Track the overall loading time of your entire webpage.
5. **Avg. Server Time:** Measure server efficiency in generating webpages for faster browsing.
6. **Avg. DOM Processing Time:** Focus on browser processing time for seamless display.
7. **Avg. On Load Time:** Ensure complete functionality with this metric of full-page rendering.
8. **Avg. Encoded Body Size:** Optimize data usage with insights into compressed content size.
9. **Avg. Decoded Body Size:** Understand the weight and efficiency of your webpage content.
10. **Avg. Transfer Size:** Monitor HTTP header size for faster, more efficient page loads.

By harnessing these metrics, you can fine-tune and monitor your website performance, resulting in:

1. Faster loading times
2. Enhanced user experiences
3. Improved search engine rankings
4. Reduced bounce rates
5. Increased conversion rates

Don't let slow loading times hinder your online success. Stay ahead of the competition!

Enable Web Analytics Performance Metrics today!

Normalized Automatic with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Automatic with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Legacy - Normalized AdX + AdSense with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Legacy - Normalized AdX + AdSense + Open Bidding with five Dimensions: Date, Hour, Ad Unit, Size and Custom Dimension "AY Hash"

Google Ad Manager: Automatic Mode!

A new mode called Automatic has been added!

This feature automatically picks the best data connection configuration for GAM revenue data and further improves accuracy. From <0.5% discrepancies to <0.1%.

Key Highlights of the Automatic Mode:

- Automatic Configuration: Detects and uses the best configuration.
- Enhanced Support: It adds additional support for cases where only Open Bidding (without AdX) is bidding and winning impressions.
- Improved Accuracy & Change Stability: It is recommended to adopt the new mode (Normalized Automatic)
- Recommended Attention: Switch to Automatic Mode for better accuracy and stability.
