AY Product Updates: New Features and Improvements

Smarter Tools, Better Insights, and Optimized Performance!

more efficient.

👉 Below, you'll find a summary of these updates and how they benefit you.

🚀 New Features

Prebid Server-Side

- **Dynamic Flooring**

Unique machine learning models tailored to your historical data maximize your revenue by setting the optimal price floor.

Yield Manager

- **User Deployment Notifications**

Stay informed about deployment changes with automated email summaries, ensuring better transparency and traceability.

- **Placements Under Ad Units**

Simplify management by organizing placements under corresponding Ad Units for improved usability.

Ad Units 1 item						
Enabled	Internal Name	Ad Unit path	Media types	Sizes	Refs	
☒	my-ad-unit-2	/6355419/Travel/Europe/France/Paris-2	banner	20×20	1	

Placements 1 item						
Enabled	Identifier Name	Internal Name	Inject	Placement	Position	
☒	div-gpt-new-ad-2	my-ad-unit-2	☒	#ad-container	afterbegin	

- **Global Variables**

Save time and reduce errors by defining variables across all entities in your organization for consistent configuration.

Organization Variables 					+ New Variable
Name 	Type 	Value 	Changed by 	Changed at 	
enableIndexExchange	Custom Javascript 	function () { var notApproved = ['clashof...}	accounts@assertcom.de	02/10/2024, 16:53:25	
domain	Custom Javascript 	function () { var host = window.location....}	accounts@assertcom.de	25/09/2024, 10:33:52	
SubCacheId	Custom Javascript 	function () { switch ('{(GLOBAL.domain ...}	accounts@assertcom.de	02/10/2024, 17:12:06	
fallbackConversionRate	Simple Value 	0.89	accounts@assertcom.de	25/09/2024, 10:08:22	

- **Refresh by Line Item Type**

Gain greater control by disabling refresh for specific line item types like Sponsorship, ensuring compliance with specific advertiser needs.

Refresh Limits

Prevent specific demand such as Direct or AdSense from refreshing.

All impressions will refresh when both 'include' and 'exclude' are empty. If you use 'include', only the values specified in 'include' will be allowed to refresh. On the other hand, 'exclude' prevents the refresh for the specified values and takes precedence over 'include'.

Include

Advertiser Identifier Names

Select or create a value 

Order Identifier Names

Select or create a value 

Line Item Types

Select a value 

Since v3.1.0

Exclude

Advertiser Identifier Names

Select or create a value

Yield Optimizer - Traffic Shaping

- **Automated Floor Price Optimization**

Automatically apply the best-performing floor prices with server-side models that are updated hourly, ensuring maximum revenue potential for your traffic.

- **GAM Flooring Support**

Extend holistic flooring to include In-App inventory, enabling consistent optimization across all inventory types.

A new mode called Automatic has been added.

Mode

Normalized Automatic with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Normalized Automatic with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Automatic with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Legacy - Normalized AdX + AdSense with seven Dimensions: Date, Hour, Ad Unit, Size, Custom Dimension "AY Hash", Device Type

Legacy - Normalized AdX + AdSense + Open Bidding with five Dimensions: Date, Hour, Ad Unit, Size and Custom Dimension "AY Hash"

Yield Optimizer - Dynamic Flooring

- **Server-Side Flooring**

Manage floor prices on the server side using large ML models with automatic optimization to improve auction revenue.

Yield Intelligence - Analytics

New

As a user you are now able to report on a Bidder's Response Time by the following percentiles P50, P75, P95 and P99.

Bidder

The exchange/SSP partner.

- **Quick Share**
Save time with one-click sharing of reports with other users in your organization, speeding up analysis and decision-making.
- **Custom API Key Generation**
Gain more control over your data with personal access tokens, improving visibility and security for your API use.
- **Export to Google Sheets**
Seamlessly export report data into Google Sheets for further analysis or sharing with your team.

Improvements

Yield Optimizer - Dynamic Flooring

- **Client-Side Refactor**
Enjoy a more reliable and maintainable flooring system that improves performance across all client-side operations.
- **Dynamic Segmentation Optimization**
Continuously optimize traffic adjustments through dynamic segmentation for better results.

Prebid Server-Side

- **Infrastructure Upgrades**
Handle traffic spikes and bad bidders more effectively, ensuring higher platform reliability and stability.
- **Enhanced Video Integrations**
Deliver a smoother video ad experience with gradual support rollout for In-App integrations.
- **Auction Optimization**
Improved handling of bad bidders to reduce their negative impact on auction performance, ensuring better results.

Yield Manager

- **Customized Editor Enhancements**
Save time and reduce errors with syntax checking and code formatting built into the editor.
- **Quick-Analytics by Deployment Version**
Quick access to reports tied to specific deployments for granular insights and faster troubleshooting.
- **Preview Enhancements**
Pin and quickly access recently viewed preview URLs, saving time during testing and debugging.

Data Integrations

- **Outbrain & Taboola Improvements**

Revenue attribution is now based on clicks instead of impressions (optionally), offering more accurate and actionable insights.

- **Pinterest DSP Integration**

Track campaign spend with new reporting capabilities, providing a more comprehensive view of your ad performance.

👏 What's Next?

We hope these updates improve your workflow, enhance your experience, and deliver measurable and better results.

For more details or to explore how these updates can directly benefit your operations, feel free to contact your account manager or reach out to us at: <https://www.assertiveyield.com/help-center/ay-support/>
