Backend Engineer (Golang)

 **The Netherlands** **Full-time** **Development**[Apply for this role](#)

About Assertive Yield

Assertive Yield B.V., a scale-up PubTech company in the AdTech ecosystem, caters to some of the largest publishers worldwide. Our distinct granular data analytics platform sets us apart from the rest of the market. While our HQ is in Amsterdam, our team is globally dispersed. We aim to provide publishers with comprehensive and dependable analytical data powered by machine learning and cutting-edge technologies, creating a single source of truth for holistic revenue analysis.

As we continue to grow we are seeking a Backend Engineer to join our team. The ideal candidate will be responsible for developing and implementing end-to-end solutions, ensuring the smooth functioning of our applications, and improving their performance.

Key Responsibilities

- Design, develop, and maintain high-performance Go microservices using FastHTTP, gRPC, and Protocol Buffers
- Build and optimize distributed client-server architectures that run across customer infrastructure
- Implement real-time ML inference integration with models in C
- Create robust data ingestion pipelines feeding into the Data Warehouse for analytics and ML training

Performance & Reliability

- Optimize systems for sub-millisecond response times under high load
- Implement graceful degradation, circuit breakers, and fallback mechanisms
- Conduct performance profiling, benchmarking, and optimization (CPU, memory, GC tuning)
- Design for fault tolerance and high availability in production environments
- Monitor production systems using Prometheus, structured logging, and custom metrics

Architecture & Best Practices

- Contribute to architectural decisions for scalability and maintainability
- Write clean, maintainable, well-tested code following Go best practices
- Implement comprehensive testing (unit, integration, E2E) with snapshot testing
- Participate in code reviews and mentor junior engineers
- Document system design, APIs, and operational runbooks

Collaboration

- Work closely with ML engineers to integrate models into production systems
- Collaborate with DevOps on containerization (Docker), orchestration (Kubernetes), and CI/CD. Partner with product managers to understand requirements and deliver features
- Participate in on-call rotation for production support

Required Experience

- 5+ years of professional backend engineering experience
- 3+ years of production Go development with a deep understanding of the language
- Strong experience building distributed systems and microservices architectures
- Proven track record of building high-performance, low-latency systems (< 100ms response times)
- Experience with gRPC, Protocol Buffers, and modern API design
- Production experience with containerization (Docker) and orchestration (Kubernetes)

Required Technical Skills

- Expert-level Go programming (concurrency patterns, memory management, performance optimization)
- Distributed systems concepts: service discovery, consensus, eventual consistency, CAP theorem
- High-performance networking: HTTP/2, connection pooling, load balancing
- Database experience: SQL, indexing, query optimization
- Testing: unit tests, integration tests, benchmarking, profiling
- Version control: Git workflows, code review pra

Nice-to-have Skills

- AdTech/RTB ecosystem: SSPs, DSPs, bidding protocols, OpenRTB
- Real-time bidding systems and auction dynamics
- ML model integration: serving, versioning, A/B testing

What we offer

 Fully Remote Role: Work from home in the Netherlands.

 Flexible Work Hours: Choose a schedule that suits your productivity style.

 Professional Growth: Opportunities for career advancement and continuous learning.

 High Impact: Your work will directly support our clients and shape our product's future.

 Smart & Supportive Team: Join a diverse and driven group of professionals passionate about pushing AdTech boundaries.

We look forward to hearing from you

At Assertive Yield, we're looking for people with passion, grit, and integrity. You're encouraged to apply even if your experience doesn't precisely match the job description. Your skills and passion will stand out—and set you apart—especially if your career has taken some extraordinary twists and turns. At Assertive Yield, we welcome diverse perspectives and people who think rigorously and aren't afraid to challenge assumptions. Join us.
