Senior DevOps Engineer

 Remote Full-time Development[Apply for this role](#)

About Assertive Yield

Assertive Yield was born out of the need for publishers to have more transparency regarding advertising data.

The company was founded in 2019 to provide more transparency, ownership, and revenue to digital publishers on their ad stack. We believe in data-driven optimization and personalization to track data for digital publishers and increase advertising revenue.

We build technology for digital publishers to maximize revenue, efficiency, and control across their ad stack. Our platform features a next-generation wrapper (Yield Manager), real-time analytics (Yield Intelligence), and an AI-powered Prebid Server, supported by capabilities such as Dynamic Flooring, Traffic Shaping, and Granular Alerting.

We are seeking an experienced and motivated DevOps Engineer to join our dynamic team. In this role, you will be instrumental in building and maintaining our bare metal infrastructure and ensuring its availability for on-call rotation schedules to address critical production issues outside of normal business hours. As well as infrastructural streamlining, deployment pipelines, and ensuring the reliability and scalability of our services.

You will work closely with development and operations teams to foster a culture of seamless integration and continuous delivery.

Responsibilities

- Design, implement, and manage our Kubernetes infrastructure for container orchestration and scaling.
- Develop and maintain CI/CD pipelines to enable rapid and reliable deployments, including advanced deployment strategies like canary deployments.
- Monitor and troubleshoot production environments to ensure high availability and performance.
- Automate infrastructure provisioning and configuration management using tools such as Terraform or Ansible.
- Implement and manage logging, monitoring, and alerting solutions.
- Collaborate with development teams to optimize application performance and reliability from an infrastructure perspective.
- Contribute to the security and compliance of the infrastructure and deployment process.

Minimum requirements

- Proven professional experience as a DevOps/SysOps Engineer or in a similar role, 5+ years.
- Strong expertise in containerization technologies, specifically Kubernetes.
- In-depth experience with implementing and managing continuous integration and continuous deployment (CI/CD) pipelines.
- Experience with deployment strategies, including canary deployments.
- Experience with Infrastructure as Code (IaC) tools (e.g., Terraform).
- Experience with Linux operating system administration, including performance tuning and troubleshooting.

Nice to Have

- Experience with distributed databases and columnar store technologies, particularly ClickHouse.
- Familiarity with service mesh technologies (e.g., Istio, Linkerd)
- Certification in Kubernetes (e.g., CKA, CKAD).

What we offer

- Innovative and dynamic environment.
- Opportunities to grow.
- Continuous learning with high-level professionals.
- Fully remote, full-time, and flexible working hours.
- A fun, smart, and diverse team.
- Competitive salary.

If you're interested in cutting-edge technology and are looking for a high-performance team at a fast-growing business, come and join us!

We look forward to hearing from you

At Assertive Yield, we're looking for people with passion, grit, and integrity. You're encouraged to apply even if your experience doesn't precisely match the job description. Your skills and passion will stand out—and set you apart—especially if your career has taken some extraordinary twists and turns. At Assertive Yield, we welcome diverse perspectives and people who think rigorously and aren't afraid to challenge assumptions. Join us.
