

The Secret Behind Kurier's 10%+ Revenue Growth: Speed & Control

The Kurier logo consists of the word "KURIER" in a white, serif, all-caps font, centered within a solid red rectangular background.

Key Takeaways

- 10%+ Revenue Per Session (RPM) increase
- A/B/n testing launched and completed in hours, not weeks
- Seamless demand partner integration via a single script
- Real-time, granular data insights for smarter decisions
- Reduced costs with all-in-one platform unifying 11+ essential ad tools
- Streamlined workflows that free up developer resources to focus on core product innovation
- Agility and autonomy to test and optimize monetization strategies

About Kurier Media House

[Kurier Media House](#) is a prominent Austrian news website offering up-to-date coverage of local, national, and international events. Known for its broad range of content, it covers topics such as politics, business, sports, entertainment, lifestyle, and more, often delivering breaking news and in-depth reports. The site maintains a balance between traditional journalism and modern digital trends, ensuring accessibility across multiple platforms, including social media channels.

[Kurier Media House](#), one of Austria's leading daily newspapers with a strong digital presence and a diverse audience portfolio, was seeking a solution that could enable seamless onboarding of demand partners from both local and open bidding, provide in-depth data analysis, facilitate swift A/B testing, and support continuous optimizations.

After evaluating other solutions in the market, [Kurier Media House](#) partnered with [Assertive Yield](#) to implement our all-in-one wrapper solution, [Yield Manager](#). As the other solutions they evaluated in the market, lacked the completeness needed for Kurier's portfolio.

The Challenge: The Need for More Agility and Control

Before adopting Assertive Yield, Kurier's ad management team was limited by manual processes and had to rely on its tech team for several tasks. Adjusting ad placements took weeks, causing delays during key periods like the elections. The lack of header bidding solutions, combined with diminishing returns from open bidding, restricted Kurier's ability to onboard new demand partners and fully monetize its inventory.

"We had to ask our tech team for every small change," explained Georg Klauda, Head of Ad Operations and Technologies at [Kurier Media House](#). "It was time-consuming and often deprioritized in favor of other projects, as tech resources were limited."

The need for a more flexible, agile, and cost-efficient solution that combines multiple functionalities in a single platform prompted Kurier Media House to seek a partner that could support their ability to adapt to fast-changing market dynamics, unlock new revenue opportunities, and gain deeper insights into ad performance.

The Solution: More than a powerful client-side wrapper, Next-Gen Yield Manager

[Kurier Media House](#) took full control of its inventory, showcasing its proactive approach to innovation. Leveraging the Yield Manager's no-code A/B/n testing capabilities, Kurier's ad management team can now independently add, adjust, and test ad placements, scenarios, layouts, and any part of their inventory, achieving instant results without relying on its technical support.

This independence freed the team from reliance on the tech department, cutting implementation times from weeks to hours and saving costs.

Georg highlighted, "We regularly see new features that help us stay ahead in the market. It was the right decision to work with Assertive Yield."

[Kurier Media House](#) elevated its demand strategy with [Yield Manager](#), seamlessly integrating new demand partners through a single script. Demonstrating their forward-thinking approach, Kurier successfully transitioned to a header bidding environment for the first time. With the addition of

Prebid.js, they unlocked access to high-value partners, including those previously out of reach through open bidding.

"Assertive Yield made it possible to onboard demand partners we couldn't access before," Georg shared.

"The easy plug-and-play functionality lets us integrate partners and optimize setups quickly."

With advanced analytics at their fingertips, [Kurier.at](#) gained the ability to monitor and optimize CPMs, RPMs, and fill rates in real time. This proactive approach enabled them to maximize monetization and extract greater value from their inventory.

The Results: Flexibility, Efficiency, and Revenue Growth

[Kurier.at](#)'s partnership with [Assertive Yield](#) has led to remarkable improvements in CPMs, streamlined workflows, real-time data analysis, revenue opportunities, and newfound agility in ad management. With Assertive Yield's solutions, they saw transformative results:

- **Revenue Boost:** Kurier.at experienced a more than 10% increase in Revenue Per Session (RPM), driven by several factors, including improved demand partner integration and optimization.
- **Agile AdOperations:** Tasks that once took weeks were completed in hours, thanks to direct control over ad placements and an easy-to-use management platform.
- **Streamlined Optimizations:** The team's independence to run A/B/n tests without needing the tech department saves time and resources, enabling faster responses to editorial changes.
- **Competitive Intelligence:** Advanced analytics uncovered new opportunities and improved decision-making, ensuring every partner and placement performed optimally.

"Assertive Yield changed the game for us because we can now manage our whole inventory within the ad management team. We are much more flexible," said Georg. "They helped us save time and add new features and monetization options that we didn't have before, such as Prebid and header bidding, which are now easily possible."

The Future: Innovation and Growth

With a forward-thinking approach, [Kurier.at](#) is poised to explore new opportunities, including server-side header bidding, Prebid Server, Dynamic Flooring, and other innovative monetization strategies. The team remains committed to continuous improvement, actively testing new ad placements, demand partners, and cutting-edge solutions while leveraging Assertive Yield's advanced features and ongoing developments.

"I highly recommend Assertive Yield. The speed of the solution stands out, there are no noticeable delays in page load times, and it integrates seamlessly with our website. The setup is easy, just one snippet of code, and you're ready to start building ad units. Onboarding is simple, and the features of Yield Manager, Yield Analytics, and the Wrapper solution are all user-friendly," Georg Klauda, Head of Ad Operations and Technologies at [Kurier.at](#).
